

Mystery Science Night

Who put What Where?

When we came into Embers tonight we found there was an item missing from our fairy glade. In hunting for it we discovered:

- a footprint
- a fingerprint
- a hair

We also discovered 6 suspects.

Although we discovered the missing item we would like you to see if you can figure out:

1. what was missing
2. where it was found
3. who put it there

The answer cards are in a sealed envelope under our toadstool.

When you finish trying each experiment your team will receive a card. Put an "X"

beside that person, item, or location because if you have that card it can't be in the envelope – right?

Your team can collect extra clues at the crime lab station. Good luck!
